## Denial of Job Placement and Job Place Discrimination

- Gives an example listing (the full list ranges in the thousands) of the number of jobs that were applied to in the US and how they were systemically denied, all below my skill level. These are example of how basic livelihood was intentionally limited in the US.

### Intentional and Illegal Job Place Discrimination

The denial of jobs or employment in the US is easy to demonstrate. Even when most of the jobs applied to are below my skill level there are still no reply. The US was aggressive about job place denial, this is a small sample but there are hundreds of emails to substantiate job place denial.

The reason this was done appears to be to impoverish me using the effects of my clinical condition (make a person seem indolent or ineffective while using the effects of a clinical syndrome to justify the mistreatment). It ties closely to mistreatment in medicine; if the medical doctors created enough neurological damage they could effect basic livelihood by doing as. Though I am clearly very capable and intelligent in job place settings.

The number of jobs applied to in the US by me equated to thousands, with no reply. Within the employment setting there is discrimination with the intent of mis portrayal.
